Hot swap terminal units
For loadless hot swapping of digital and analog expansion modules, when used in configurations with communication interface modules or AC500 CPU supporting hot swap. Hot swapping of attached expansion module mounted on hot swap terminal unit is supported by AC500 V3 CPU modules as of PM5630-2ETH, AC500 V2 CPU modules as of PM585-ETH, CI501-PNIO, CI502-PNIO, CI541-DP, CI542-DP, CI521-MODTCP and CI522-MODTCP. AC500-S safety I/O modules cannot be used in configurations containing hot swap terminal units. Mixed configurations of hot swap terminal units with normal terminal units for digital and analog expansion modules are possible. In the installation hot swap terminal units can be idenfied by the word Hot Swap and a white frame around the connection terminal area.
